Predictive Maintenance Project Proposal

Objective

The data team's objective is to develop a machine learning model that will help perform predictive maintenance on the delivery company's fleet of delivery vehicles.

Planning and Analyzing stages			
Milestone	Tasks	Outcome/Deliverables	Estimated Time
Milestone 1	 Outline project workflow Gather data from various sources Identify software/hardware needs 	Stakeholders updated	2–3 weeks
Milestone 2	Clean, convert, and format data	 Database ready for modeling Stakeholders updated 	2–3 weeks
	Constructing a	and Executing stages	
Milestone 3	 Finalize modeling strategies Build machine learning models Test models for accuracy 	 Machine learning model Stakeholders updated 	4 weeks
Milestone 4	 Finalize results Share findings with stakeholders Incorporate feedback 	VisualizationsExecutive summaryResults	3 weeks
